Approved for public release; distribution unlimited.	

13. ABSTRACT (Maximum 200 words)

Testing software applications on OS/2 Warp was my major job responsibility. This included receiving applications from independent vendors and testing them in a laboratory with other members on the test team. If the application passed, it would receive a seal to be placed on the application when it is placed on the market; however, if it failed, we would try to work with the vendor to correct the bug(s) and enable it to run on IBM's platforms. The other area of concentration was with HTML programming. I was given the task of developing the internal Web pages for our department and was partly responsible for its upkeep.

Outline of Key Co-op Activities

I. Software Testing
   A. Ready for OS/2 Warp...NSTL Tested Marketing
      Program
   B. How the testing is done

II. HTML (HyperText Markup Language)
   A. What HTML is
   B. How I used HTML
   C. Some basic HTML tags
   D. An example of an HTML documents (code)
   E. An example of an HTML page

__HTML__

* What HTML is

* How I used HTML

* My responsibilities

How the testing works

* Applications are received from NSTL

* Tested on appropriate operating system for problems

* If there are no problems, the application "passes"

* Options if problems are present
  - try to correct the problems ourselves
  - work with the vendor to correct the problems
